At Westminster stand with submissive Awe :  
Behold how clean the Rook doth pluck the Daw :  
Tho' he be plump and fat, he'll soon look lean ;  
Tho' rich and wealthy, quickly poor and mean.  
The Law is good, made for no other ends  
But for to right the wrong'd, and keep Men friends.  
To help the Poor, relieve the Fatherless,  
And how they are, the Reader he may guess.  
But now 'tis (Term-time;) then what shall we say ?  
Why faith it is the Lawyers Holiday.

The foregoing Table explained.

NOTE that the Moon's Age being taken notice of by the Rule in this Table, you may obtain the time of High-water at all the Places above-nam'd. (Observe) when the Moon is one or sixteen days old, it is High-water at London, Tinnmouth, Hartlepool, &c. At 3 a-clock and 48 Minutes past, observe the same of the rest, which is plain to the meanest Capacity: The Day of the Moon's Age you have in every Column on the left Hand Page of the Almanack.

*The Use and Explanation of the Almanack.*

ON the Left hand Page there are eight Columns; The first shews the Days of the Month, the second the Days of the Week, the third shews the Fast and Festival Days used in the Church of *England*, and also the Rising and Setting of several noted fixed Stars, as likewise their Southings; the fourth shews the *Sun's* Place passing through the twelve Signs of the Zodiack; the fifth shews the *Moon's* Place or Dominion over the Body of Mankind; the sixth shews the *Moon's* Age to every Day of the Month, which answers to the *Moon's* Age in the Tide-Table, and is the most easie and readiest way to find the time of High-Water at all those Ports and Places found in the Table; the seventh Column shews the time of the *Moon's* rising and setting; wherein more, that from the Change to the Full, you have the time of the *Moon's* setting in Hours and Minutes; and from the Full to the Change you have her Rising in Hours and Minutes. A. stands for Afternoon, and M. for Morning. *Example*: Suppose you would know when the *Moon* sets on the ninth Day of *January* this present Year, over against which Day in the Column of the *Moon's* rising and setting you have 2-56, which shews the *Moon* sets at 2 of the Clock, and 56 minutes past in the Morning, signified by the M. over it: Again, on the 14<sup>th</sup> Day the *Moon* rises at 7 a-clock, and 40 minutes past in the Afternoon, signified by A. and so of the rest: The eighth and last Column of this Page shews the mutual Aspects of the Planets and the Weather.

The Right-hand Page hath five Columns; the first shews the Day of the Month, according to the *English* Account; the second the Days according to the *Roman* Account; the third the Rising of the *Sun*; the fourth the Setting of the *Sun* (thus:) On *January* 13. the *Sun* rises at 7 a-clock, and 46 minutes past; and sets at 4, and 14 minutes past; and so of the rest: the fifth Column shews the Full, Changes and Quarters of the *Moon*, with Observations on every Month.

# January hath xxxi Days.

Now, Courteous Reader, give me leave to tell,  
That when Rome's Empire to Destruction fell,  
The Pope usurp'd, and made that Seat his own  
By hellish Craft, and wore a tripple Crown ;  
With (Keys and Crosses) jingling by his side.  
No more a Man, but now the God of Pride.

God preserve the Kingdoms of Great Britain and Ireland, and the most Heroick King thereof, now matters of great moment are near agitation, and the active Spirit of the most Generous act very vigorously to prevent impending Storms. The much talk'd of Year of Jubilee is past over; but it took its Farewel with a notable ♂ of the two Infortunes, viz. h and ♂ in ♄; and those Countries, Cities or private Persons subject to that Sign Full Moon the 13th day at 1 Afternoon. will undoubtedly be made sensible of its Effects: They both cast an envious Square to Venus, which threatens Females in general with stubborn Discales, especially such as do proceed from Cold, which may turn to violent Fevers even at this time of the year, and send some to the Shades, whilst others are swallow'd up in the Grave of despair; and an eminent Lady afflicted with much Sorrow, if not Death. The ♂ of ☿ and ♀ gives notice of great Councils and Consultations about great and eminent matters, it is hoped New Moon the 28th day, at 1 Morn. to good purpose; but Quot homines tot sententiae. So many Men so many Minds.

# February hath xxviii.

This Man of Sin could never rise so high,  
Nor come to that mighty Maturity,  
Until the Emperour he had o'erthrown,  
And made that great Imperial Seat his own:  
Upon which Ruins he hath built a Nest,  
And thereon rais'd his domineering Crest.

## Astrological Observations.

1	12	7	18	4	42	This Month presents us with 5 Conjun-

6	17	12	23	9	47	tions on foot; and this is indeed like to be
7	18	13	24	10	48	a very active Spring. God grant we may
8	19	14	25	11	49	continue in Peace. England, 'tis true, hath
9	20	15	26	12	50	many Enemies, but those most dangerous
10	21	16	27	13	51	are Domestick: the ☿ of ♄ and ☾ points

20	31	26		23	61	pent their Folly in a Halter, it is not
21		27		24	62	strange. God preserve the Ships at Sea:
22		28		25	63	for violent Storms are threatned, with
23		29		26	64	cold and dark Air: Now let him that hath
24		30		27	65	a true Friend, keep him if he can; let

\* Note, the Roman Account is now 11 days before ours; their 12th being our first, and our last their 11th.

# March hath xxxi days.

This mighty Tool from mean Estate first rose ;  
But in short time did the whole Earth oppose :  
He quell'd the Emperour with mighty Power,  
And next the Saints of God he did devour.  
Judge then and see, sure Antichrist is come :  
The marks are plain upon this B---t of Rome.

In his unhallow'd Hand two gilded Keys  
 He holds, to open Heaven when he please,  
 And shut it too, curse, bind, absolve, release,  
 Pull down, set up too, whomsoe'er he please.  
 Sure this is Pride, and matchless Impudence,  
 That can for Money with God's Laws dispence.

 2 13 3 57 8 3 This Month is usher'd in with a Con-

 4 15 3 58 8 2 not pass over without some notable Sig-  
 5 16 3 59 3 1 nification, perhaps a deserving martial  
 6 17 4 0 3 0 Man advanc'd by his Prince; or some-  
 7 18 4 1 7 59 thing like it will be manifested: but the  
 8 19 4 2 7 58 Opposition of *Jupiter* and *Mercury* may  
 9 20 4 3 7 57 *Full Moon the 9<sup>th</sup> day, at 1 morn.*  
 10 21 4 4 7 56 cause some young Clerk to be degraded,

 18 29 4 14 7 46 are not far from the Body of *Mars*,  
 19 30 4 16 7 44 which will make the Effects the more vio-  
 20 31 4 18 7 42 lent and remarkable, especially to those  
 21 1 4 19 7 41 Places signified by the Sign *Leo*. God

 23 3 4 22 7 38 also bless us from violent Fevers, which  
 24 4 4 24 7 36 *New Moon the 24<sup>th</sup> day, at 9 morn.*  
 25 5 4 26 7 34 may be feared. *Rome* and all *Italy* are

# October hath xxxi Days.

This 'tis he aims at, utter Dissolution  
Of mighty Kings, by bloody Persecution,  
Pronouncing that no Christian ought to live,  
Except his holy Faith he do receive.  
Forbids to trade: who then must sell or buy?  
VWhy none but (those) allow his Hierarchy.

# November hath xxx Days.

Smooth is his Out-side, meek in Sheeps Array :  
Inwardly (what) a rav'nous Beast of Prey !  
A Mouth he hath, 'tis true, and speaks great things,  
But 'tis for to blaspheme the King of Kings.  
He sets up Falshood and Hypocritie,  
And many thousands doth deceive thereby.

# December hath xxxi Days,

Now let us pray our Spirits ne'er may fail,  
 But that such Monarchs still we may bewail,  
 VWho to his Yoke yield their illustrious Necks,  
 And bow like Vassals at his haughty Becks:  
 But those that truly nursing Fathers be,  
 May be Executioners of his Cruelty.

Of the Eclipses this present Year 1701, which are in number four, as followeth.

THE first is of the Sun, on *January* the 28th Day, near one of the Clock in the Morning, it happens in about nineteen Degrees of *Aquaries*; it is invisible to us, but to our Antipodes it will appear a considerable large *Eclipse*.

The second is of the *Moon*, on *February* the 11th, near ten at Night, in about four Degrees of the *Cælestial Virgin*, and will appear visible to us, if the Air be clear, about one half of the *Moon's* Body will be obscured: This *Eclipse* happens in the first *Decanate*, or Face of that Sign, and signifies according to Authors, Seditions and Commotions amongst Men, as also cold and sharp Weather. The Words of (*Jun-  
linus*) concerning such an *Eclipse* as this, informs us thus, an *Eclipse* (says he) in the Earthly Triplicity, denotes scarcity of the Fruits of the Earth, and especially Corn, or such things as are therein yearly sown; again, we are informed by the same *Jun-  
linus*, and he hath it from the Writings of *Proclus* thus: That an *Eclipse* of the *Moon*, in the first Face of *Virgo* as this is, doth denote that Kings, Princes, and Governours, shall be afflicted with Diseases and Infirmities, and that there shall also be sedition and discord amongst Men, especially in those Countries subject to that Sign, or menaced by this *Eclipse*.

The third is of the *Sun* on *July* 24th, near nine in the Morning in 12 Degrees of *Leo*, it will be scarcely discerned by us in these Northern Parts, by reason of the *Sun's* great North Declination, and the *Moon* having South Latitude at that time; but to those inhabiting the more South-East Parts, it will appear considerable. This *Eclipse* happens in the second Face or *Decanate* of *Leo*, a fiery and fixed Sign, and denotes, as say (Authors) much Trouble and Vexation to Kings, Princes, and great Men, also great Mutations and fatal Evils: the Luminaries are but just separated from the Body of *Mars*, and it is no wonder if we hear of many violent Actions, and of as many violent Diseases among mankind. Now let *Rome* look to it, and the whole Conclave of Cardinals, with all their Priests, Jesuits, and Fryers; if the Sign *Leo* be, as is agreed by all Authors, it is the Ascendant of that City, and indeed all *Italy* in general; for now both Fire and

Faction is threatened, and is like in all probability to happen amongst them, and terrible Claps of Thunder in many other Places. One thing in this Eclipse is remarkable, and that is, it happens near the Place of the last Tripple Conjunction of *Saturn* and *Jupiter* in the Years 1682 and 1683, and may in some measure make those Nations, Countries and People subject to that Sign, sensible of its Effects; before their next Meeting in *Aries* in May 1702, as nigh as it is.

The Fourth and last, is an Eclipse of the *Moon*, and happens on *August* 7. about two of the Clock in the Afternoon, and therefore must needs be invisible to us: it happens in about twenty five Degrees of *Aquarius*; but as it will not be observed by us, I shall take no further notice of it, only re-mind you that it happens in the opposite Sign of the Sun's Eclipse the last Month, and how far this may aggravate the Effects of that, let time make manifest; and so much for the Eclipses this Year.

In the next place I shall proceed to give the Reader an Account how the Celestial Bodies are disposed in the ensuing Year 1701, and what they may seem probably to signifie unto this lower VWorld: but in the first place (God permitting) I shall treat of

The Sun's Ingress into *Capricornus*, or the Celestial Goat, which is as followeth:

Upon *Wednesday, September* 10. 1700. at 48 Minutes past 5 in the Afternoon. This is called the *Brumal* or *Winter Quarter*, and continues that space of time that bright *Sol* makes his Perambulation through *Capricornus*, *Aquarius* and *Pisces*: In the Scheme *Cancer* ascends on the Horoscope and the Sign *Pisces* culminates the *Moon* in the eleventh; is opposed by *Venus* in the fifth, and is also squared by *Jupiter* in the seventh; which together with the Conjunction of *Saturn* and *Mars* at the latter end of this Month of *December*, will stir up Quarrels and Contentions amongst Men especially in those Countries, and amongst those People subject to that Sign *Pisces*. *Mars* in the Figure is posited in the eighth House, which is termed by all the Learned in this most noble Science, to be the House of Death; and if from this we hear of violent and sudden Deaths in many places it is not strange. The Year makes its Exit with a Square

of *Saturn* and *Venus*, which threatens Females in general with Diseases, especially such as proceed from a Defluxion of Rheum and other Maladies, occasion'd by Cold; and an eminent one with much sorrow, if not Death; which is all I shall say here as touching this Quarter, referring you to the Observations on the Month of *January* and *February* for the rest. Thus you may see the Stars do incline, but not compel Mens Minds to Good or Evil, as was the Opinion of *Barde-sanus*, *Pricillanus*, *Marcus*, and others, who looked no further than these secondary Causes, and so concluded *fatalibus A-stria*; and that Men are enthralled to the Stars, and what VVickedness they do commit, they are compelled to it by the Influence of the Planets: No, this is to bind the unlimited *Jehovah* under a necessity of Destiny, and set the Creature above the Creator; so that it is undeniable, but that Men may be inclin'd, but not compell'd to do good or evil by the Influence of the Stars; which brings me to the next thing to be consider'd, which is the Sun's Entrance into *Aries*, and begins the Spring Quarter.

VVhich commenceth this Year on *March 9*, at 25 Minutes past 7 at Night; at which time 14 degrees of *Libra* doth ascend, and 18 Degrees of *Cancer* culminates; the Angles are all possessed by Cardinal Signs: This Quarter is like to begin moderately; yet the Lunar Eclipse in the Month *February* will begin to operate to purpose in a short time. *Mars* is in the 7th, but posited in *Taurus* on the Cusp of the 8th, and about the 19th of *April* meets with a Square of *Jupiter*, which will in all probability stir up former Mischiefs, but more especially in *Ireland*: For now the *Raparee* or Tory Party will be very busie. *Sol* and *Mercury* in *Aries*, and in the 6th House, denotes many Infirmities, chiefly in the Eyes, and will receive damage by Servants, and the baser or many ignoble sort of People will be apt to envy their Superiours; it also threatens the younger sort of People with Sicknes, and the smaller sort of Cattle with Death. Now the *Mos-covite* seems very busie in making Preparation for great things, which may in some measure make good that ancient Prophecy of *Sibylla Tiburtina*, found in the Year 1520, in the Bowels of a Mountain in *Switzerland*, after a great Inundation of VVaters, which broke down part of that Mountain, and left discover'd in the Ruins the following

VWords fairly engraven upon a large Marble Stone, in very old Latin Characters and Style, which you may observe as followeth:

*O Rietour Sydous in Europa soupra Iberos ad magnam septentriones domum, cojus Radii orbem terrarum ex improvise illoustrabunt. Hoc vero erit tempore desideratissimo, quo mortalis positis Armeis pacem onanimeis complectantur. Certabitur quidem varieis per dioutourni. Interregni occasionem studeis, cui Imperii habene tradantur. Sed vincit tandem auiti sanguinas propago, que eous que armorum vi progredietur, donec fata contraria fati obstiterint. *At prius hovic soumittet cervices Gallia ad ejous Genoua souplex adnatabit classibus Britannie; Italia egre ad ardua scepra respirans, olli languentem portendet dexteram. Hac omnia denique erunt, Nox interitus Rouina Dampnatio ac ceteræ Tenebrai.*

In English you have it thus:

'A Star shall arise in Europe over the Iberians, towards  
'the great House of the North, whose Beams shall unexpect-  
'edly enlighten the whole VVorld.

'This shall be in a most desired time, when Mortals wearied  
'ed with VVars, shall unanimously desire Peace; they shall  
'strive indeed by occasion of a long-lasting Interregnum with  
'various Studies which shall obtain the Reigns of Empire.  
'But at last the Offspring of the ancient Blood shall overcome,  
'and proceed victoriously by force of Arms, until resisted by  
'contrary Fates; for about the same time this Star being set,  
'another coeval Light blazing with more ardent Flames of VVar,  
'shall spread his Empire, even to the Coast of the Antipodes.  
'But first France shall submit her Neck to his Yoke; and  
'Brittany, suppliant in Ships, shall cast herself at his feet.  
'Italy faintly breathing towards Scepters, so high,

high, shall stretch out to him her languishing Hand ; but  
 this bright Beam before his time, shall with the vast desire  
 of Men, abscond himself in the Clouds of the Gods.

Who being extinct, after direful and bloody Comets  
 and Flashings of Fire seen in the Heavens, there shall re-  
 main nothing for the future safe or healthy among Men.  
 The Firmament of Heaven shall be dissolved, and the  
 Planets be opposed in contrary Courses; the Spheres  
 shall jostle one amongst another ; and the fixed Stars  
 move faster than the Planets ; the Sea shall swell as high  
 as the Mountains, and nothing remain but Night, Destru-  
 ction, Ruin, Damnation, and eternal Misery.

This ancient Prophecy is recited by *Cornelius Gemma* in  
 his Treatise of supernatural Apparitions, and taken notice of  
 by several other good Authors ; as particularly by the famous  
 and most incomparably learned *Tycho Brahe* in his Discourse  
 on the new Star that appear'd to the VWorld Anno Christi  
 1572. who thus expresses his Judgment of it. ' There  
 were (saith he) divers Expositions of this Prophecy at  
 the time when it was first found out ; some interpreting  
 it of *Charles V.* others of *Philip King of Spain* ; and some  
 thought the *French King* was meant thereby : but I think  
 (saith he) it doth rather point out those *Iberi* who inhabit  
 Northward towards *Muscovia*. So that this Oracle of *Si-  
 bylla Tiburtina* did not denote the *Spaniards*, but those *Ibe-  
 rians* which are near unto the *Moscovites*, especially when  
 she useth these VVords ; *supra Iberos ad magnum Septentrionis  
 domum*, over the *Iberi* towards the great House of the North.  
 And truly *Muscovia*, *Scythia*, and *Tartaria*, do make a great  
 part of *Europe* ; so that it may well be called the great House  
 of the North : and therefore since this unusual Star did cast  
 its perpendicular Beams and Influences on the Country of  
*Muscovia*, it is not to be doubted, but that this Star, toge-  
 ther with that Tract of Land, doth agree with the *Sibylline*  
 Oracle. Thus that famous and noble *Dane*, a Person so fa-  
 mous, that *K. James I. of England*, at his being in *Denmark*,  
 went to his Castle of *Vraniberg* to visit him, and made these  
 Verses in his Commendation :

*Quod temere ausus Phaeton, vel præstat Apollo  
 Qui regit ignivomus Æthere anhelus equos,  
 Plus Tycho, cuncta astra regis, tibi cedit Apollo;  
 Charus & Uraniaes Hospes, Alumnus, Amor.*

Jacobus Rex.

What Phaeton dar'd, or what's by Phæbus done  
 To rule the fiery Horses of the Sun,  
 More Tycho doth. He rules the Stars above,  
 And is Urania's Favourite of Love.

The same Tycho in the same Treatise before-cited, hath also some Expressions which we may call Prophetick, as having spoken of a glorious and happy Age to be in the End portended by that Star, and having started this Objection That some might say, that the Light of the Gospel and Purity of Religion doth now shine out clearly, having already overcome the darkness of Papal Error. He answers these Words, 'VWhence is it then, if it were so, that many Controversies and Varieties of Opinions are defended by learned Men; insomuch that the VVars of Pens is more dangerous than that of Swords? Truly (says he) it is rather to be feared, lest we rake this Dawning and Break of Day for a clear Noon Light. Therefore I suppose that this Star doth signifie that there shall be a new Change both in Religion and the state of Humane Affairs; which we may say,

*'Ventum ad supremum est, patiuntur summa ruinam;*

*'Qui Deus in Cælis regit, & reget omnia Terris.*

*'We are now come to the highest Perfection, (the Power of Antichrist) and the Pope shall decay and be brought to ruine; and God who ruleth in Heaven, shall also rule things on Earth.*

'But if any do object, that the End of the VWorld is at hand, and that therefore there will not be sufficient time to bring about a new Change; I answer, that S. Paul doth assure us, that the Jews shall again be ingrafted into the Church before the final Consummation of the VWorld which (by humane Conjecture) must needs require some time before (they being scattered over the whole Face of the Earth) shall be gathered into one Nation; and

pos

possible it is to limit and set forth a certain time for the Consummation of the World, which only dependeth on the good Will and Pleasure of Almighty God, and is not so much as revealed to the Angels, and therefore cannot be known to any humane Presence.

But if some do suppose that the Tract of Land to which this Star was Vertical, is ominous above the rest; as if from thence the Occasion and Author of so many and great Mutations are to be expected; we must then chuse out those Parts of the Earth which had the new Star in their Meridian at the time of the New Moon next following; which fell out (accounting the time by our Meridian) upon November 15th. 7h. 3'. post Meridiem; to which if we apply the Latitude or distance from the Equinoctial, agreeable to the Declination of the Star, which was in 61 $\frac{1}{2}$ , the Place on the Earth answerable thereunto, must needs be *Russia* or *Moscovia*, especially that part thereof which is joyned unto *Finland*; for in that Tract of Earth this new Star in the N. Moon following was in their Zenith, just over their Heads, where it stood equally distant from the Horizon, and with a Right-angled Aspect beheld this Country. Therefore if this Position of the Star do point out the Place of the Earth from whence these Events shall arise, *Moscovia* seems especially to be designed before any other Regions which are situate towards the North, to whom this new Star was every day vertical: whether therefore the first Occasions of so great Mutations and Disturbances, shall arise from hence, which afterwards shall be sowed and dispersed into other Parts of the World, I leave to be decided by others; but verily believe that *Gogus*, whereof mention is made in *Ezekiel*, Chap. 38. and to whom *Isaiah* in his 17th Chapter and 56th Chap. and also in his 5th doth allude, and with whom *Magog* in the *Revelations*, Chap. 20. may be rightly understood the *Moscovite*, as *Castellio* hath interpreted it on the 38th and 39th of *Ezekiel*; that *Gog* should be the Leader of the *Moscovites* and *Iberians*; because the old Translation reads it, That he should be the Prince of *Mosoch* and *Thubal*; for seeing the *Hebrews* read it *Mesech*, and the *Greek* and *Latin* Interpreters do read it *Mosoch*, it is probable that the *Moscovites* are signified hereby; or else

by

‘ by this Name the whole Northern Tract of Land is included. So that ’tis very likely that *Moscovia* is principally denoted by this Star, and *Gogus* their Leader, of whom it is foretold by the sacred Prophets and the Revelations, that having made great Slaughter in *Europe*, he at last with his whole Army shall be overthrown, and so the Earth disburthened of her wicked Inhabitants; for it is probable that there must be a great Cleansing and Extirpation of all Earthly Impurities, before that peaceable and happy Age (whereof the Prophets have spoken) shall happen. Thus far the Words of that Great, Wise and Judicious Astronomer; which brings me to consider

*The Summer Quarter.*

VWhich takes its Beginning at the Sun's Entrance into the Tropical Sign *Cancer*, which this year is on *June 10th.* at about 44 Minutes past 8 at Night, and makes with us on this side the *Equator* the longest day. In the Figure we observe *Capricornus* to ascend, and *Scorpio* mounted the Mid-heaven: the Moon is posited in the first in *Capricornus*, and *Saturn* her Landlord is near *Jupiter* in the second in *Pisces*; and both beholding *Venus* in the fifth with a hateful Square: *Mars* is in *Cancer* upon the Cusp of the seventh in Trine to *Jupiter*. The Planets at the time of this Ingress are all under the Earth; the *Sun*, *Mars*, *Venus* and *Mercury* are all in the 6th House; and the most dangerous Diseases of this Quarter are like to fall heaviest upon the younger sort of People, and those are such as come by Surfeits and VWeakness of the Stomach, bringing violent Fevers. *Mars* is now become Tenant to the Moon, and she beholds him with a very angry Aspect from the first House, and if some People, subject to the Sign *Cancer*, seem uneasy, it is not strange. Soon after the Ingress you may observe all the Planets (as I before hinted in the Month of *June*) are in watery Signs, and do portend much Action upon the Seas; great Fleets preparing, both of VVar and Merchandise, which will cause great Councils and Consultations about Matters belonging to and about the VWater. Pray God bless the industrious Mariner from violent Storms and Shipwrecks. *Saturn* and *Jupiter* in *Pisces* in the 2d House gives great

### The Autumnal Quarter.

hich commenceth this Year on September 12. at 24'.  
st 10 a-clock before Noon; at which time the middle of  
*scorpio* ascends; and the very beginning of *Virgo* culminates.  
ars Lord of the Ascendant is in the 10th with *Mercury*;  
nd both oppose *Saturn* in the 4th: the Moon is in the 7th  
ear the Cusp of the 8th, in square to *Mars* in the 10th,  
nd in Trine to *Jupiter* in the 4th. Now if in this Quarter  
near the time, we hear of a certain King acting very  
ross and froward with his People, it is not strange; espe-  
ally such, that in time of need stood his best Friends: he  
in not yet suck'd Blood enough, but is yet for exercising  
ore Cruelty and Tyranny, without Pity or Piety. *Pa-*  
s and *Lions* are both under *Virgo*, and both are Places of  
reat Councils and Consultations; also great and close Con-  
ulations in many other Places; and it may be some fly  
illains detected for abusing the current Coin of this Nati-  
s, and perhaps meet a Reward suitable to their deserts;  
at *Noli gaudere repentinâ morte malorum*, (says *Cato*) *Do*  
*rejoice at the sudden Death of Evil Men*; Which is all I  
all say as touching the Quarters in general, having hinted  
ore particularly in the Observations on every Month,  
nd shall in the next place present the Astrological Reader  
with a *Decumbiture* and Judgment upon it, whereby he may  
only see the difference between the Astrological and  
common way of giving Judgment on Diseases; but may al-  
see easily that the Astrological way of giving Judgment is  
e surest and most sound, and the common way but a mere  
guess (the *Decumbiture* being rightly obtained.)

The Observation is of a certain Person, who after a long  
nd wearisome Journey, was suddenly surpriz'd at *Paris* in  
ence on January 2d Old Stile, or the 12th, New Stile, which  
on please 1641, about 8 a-clock at Night, the Moon at  
the

the same time was posited in *Aquarius*, 10 degrees and 1 Minutes, at which time he was assaulted suddenly with a *Quotidian Fever*, which was attended with a dry Cough and a *Pleurisie*; it was very violent, and had its Original from *Choler* putrified with Blood in the Veins: it is the most violent of all Fevers, and began with a shivering: the next Night after the *Decumbiture* the Fever appeared to purpose; on the third day the shivering left him; neither had he any Intermision. The Moon (as I said before) is in 10 degrees 19 minutes of *Aquarius*, it being a Sign of Infirmities; the Moon in Sextile to *Mars* is applying to *Venus* and *Saturn*; *Mars* afflicts the *Sun* with a Quartile; as also *Jupiter* and *Mercury* both in Combustion: The 6th of the same Month the Disease grew worse; for then the Moon came to a Squisquare Aspect of the *Decumbiture*, and made the first judicial Time; and meeting then with no Aspect, made a doubtful *Crisis*, which the 9th day, O. S. about 8 in the evening did produce; And this was the first *Crisis*, which brought with it a gentle Sweat; at which time his Cough and the Pain in his Side both left him; which confirms the Saying of *Hippocrates*, who in his Writings doth inform that it is very hopeful when one sick of a Fever doth sweat on a critical Day, tho' his Fever remain'd, and did indeed seem to increase, by reason of the Quartile of *Mars* to *Mercury* at the same time, and *Mercury* being Lord of the Ascendant at the *Decumbiture*.

☾ Note the Moon was in *Aquarius* at the *Decumbiture* and now comes to *Taurus* at the first *Crisis*, which Signs both Signs of Infirmity: yet for all this, his *Pleurisie* left him, the Moon being strong in her Exaltation, though w of Course.

☾ On January 13. O. S. the Moon by Transit made the second judicial Time, and was afflicted by a Trine of *Saturn* which brought fear of an evil *Crisis*: Then on the 14th day at 50 minutes past 5 in the morning, the Moon came to the opposite Place she was in at the *Decumbiture*, having no Aspect at all, neither good nor bad: This brought hopes to the Sick at this time; and now indeed his Condition was very bad, and his Physicians also in great despair of any hopes of his Recovery: But now observe on the 20th day near 4 a-clock in the Afternoon came the third

judicial Time, at which time *Jupiter* smiles upon the Moon with a friendly Trine, and proclaims a hopeful *Crisis* to ensue, which was the 23d day of *January* near 9 at Night: Now this was the second Critical Day, at which time the Moon apply'd to a friendly Trine of *Venus*, and did produce a hopeful and propitious *Crisis*; for on this very day his Feaver began to leave him, and he soon recover'd his Health. *Quod sanè miram rerum medicarum cum Cælo Harmonium & Consensum arguit.* By this you may behold the Harmony and Consent of Diseases, with the Motions of the Heavens. And to make it more plain, I will further add a Figure of the Heavens after the rational way, with a Judgment Astrological upon the Decumbiture.

*Judicium Astrologicum ex figurâ Decubitus Rationali.*

The chief and principal Significators in this Figure are the Ascendant, and *Mercury* Lord thereof is in *Capricornus*, retrograde, and also combust in the 5th House. In the next place

place we are to take notice of the 6th House, which Mars at this time is possessed by *Aquarius*, and *Saturn* Lord thereof is strong: it is his own House, and a fixt Sign; the Moon upon the Cusp thereof in *Aquarius* also; the Sun he is in 5th with the Lord of the 8th, afflicted by a Quartile *Mars* in the 8th in *Aries*; it is a fiery Sign, and his own House wherein he is very strong: This shews the Disease proceed from Choler engendred of a churlish melancholic Humour, and makes good this Aphorism, *Sol à Marte initium morbi quovis modo infortunatus; ægritudo erit Cholera ex humere bilioso orta.*

Again *Jupiter* is in *Capricornus*, a moveable Sign, in 5th; he rules the Stomach, Liver, Sides, &c. he is combated of the Sun, and in square to *Mars*; this brought the Pleurisy and *Mercury* afflicted by malevolent Planets, which makes him so posited as malevolent himself, which caus'd the Cough, (tho' a Pleurisy never comes without it;) the Moon in *Aquarius* applies to *Saturn*, and informs us that the Disease proceeded from Weariness: And this is according to the Judgment both of *Hippocrates* and *Hermes*, both famous Physicians.

Now, shall the Disease be long or short? for which let us consider these Aphorisms following.

*Sexta Domus in signo fixo, morbi longitudinem pollicetur, in Saturnus existens dominus sexta & in signo fixo, longum præstet morbum.* Rursum, *Saturnus Dominus sexta domino ascendente fortior, morbi incrementum denotat.* Postremo, *Luna domus sexta applicans, incrementum morbi portendit.*

Now seeing *Mars* is in a fiery Sign, afflicting both the Luminaries, viz. the Sun by a Quartile, and the Moon by a Sextile, which is equivalent to a Quartile, we may gather, the principal Authors of this Disease were *Saturn* and *Mars*, the one making it to continue long, and the other bringing a violent Fever; then comes in *Mercury* with a dry Cough; and last, *Jupiter* follows at the Head with a Pleurisy, which ended sooner than the Fever; and the reason is, they being both in a moveable Sign. Now the next thing to be considered is this, whether the Patient shall recover or not at this time: Recover he did though it may be admired by some how he could live

for here we find the Lord of the Ascendant combust, and applied to the Sun, *Mars* also afflicting the Sun : The Moon she is upon the Cusp of the 6th, *cum multis aliis* ; which shews that all the reasons to be given for Life, are as followeth, viz. *Saturn* and *Mars* are both strong, yet neither of them is Lord of Death ; and therefore not able to hurt in this case. Again, the Moon doth not apply immediately to *Saturn*, but to the Body of *Venus*, who is Lady of the 10th, which shews that by the Help of a wise Physician the Disease may be cured. Nay, here is another thing remarkable, and that is, a Reception between the Sun and *Mars*, which stops the Warriour's Sword at this time from killing ; besides, *Venus* is in the 6th as well as *Saturn*, and doth near as much good as he can possibly do harm at this time ; nay, neither *Saturn* nor *Mars* do behold the Ascendant, which is also a very good Sign, and shews he should recover ; and recover he did, although his Distemper was grievous. And now, to conclude, this Distemper came upon him by his misguiding of himself in his Journey, which is plainly declared by the Lord of the 12th and Lord of the Ascendant being together ; and besides, the Moon doth apply to a Fortune, which hath Triplicity in the Ascendant, although posited in an ill House. Now I dare be bold to affirm, that the Patient did travel again as soon as he was able to take a Journey, for these Reasons following ; First, because *Mars*, Lord of the End of his Disease, is near the House of long Journeys at the Decumbiture, which is worth Observation ; and secondly, because the Moon doth apply to *Venus*, who is Lady of the Third at the Decumbiture, and is the House signifying short Journeys, which are both strong Testimonies in Art of his travelling again as soon as he should recover. And so much concerning this Decumbiture, which I hope is enough to satisfy all, especially those that have a respect to Art ; And as to others who judge of Distempers by guess, I leave them in their Errours, only give them this Caution ; which is the Saying of *Bias* of *Priene*, one of the seven Wise Men of Greece, *Prius intellige & deinde ad opus accede* : First understand what thou hast to do, and then fall to thy

**B**Y the Author hereof (only) is sold his famous familiar Family Cathartick and Diuretick purging Pills, excellent for the Scurvy, Dropsie, and most other Distempers incident to the Body of Mankind: They work so gently that you may take them at any time of the Year if Need require, without danger, as many now living can testifie, who have found great Benefit by them. A Note of Direction will be given with each Box, which contains 40 Pills, for 2 s. and the half Box, containing 20 Pills, for 1 s.

The Author also thro' the Blessing of God, cures all sorts of Agues at once, whether Quotidian, Tertian or Quartan, tho' of long standing, and left off by others, as many now living can testifie, who have, by God's Blessing, been cured by him at last. This Distemper often comes by supernatural means, which is the reason it will not yield to natural means, nor be subject to the Will of every Pretender; nor indeed many other Distempers besides.

The Author has also an excellent Method and Medicine for the *Epilipsia* or *Falling-Sickness*, and Convulsions in Children. He gives his Judgment *gratis* to all that come to him and allows his Medicines at reasonable Rates. *Vivat Rex.*

**M**R. William Boyce, the famous English Operator in Glasses who lived on Ludgate-Hill, is now remov'd to the Golden Griffin in S. John's Lane near Clerkenwell, where he makes all sorts of artificial Eyes exactly like the natural having the very Motion too so exact, that they have been worn by several Persons many Years, and not known to their own Relations.
